

TetraMem pioneers multi-level RRAM in-memory computing to power next-generation, energy-efficient AI hardware from edge devices to data centers, with teams across the U.S. and Singapore.

Partnering with global smart hardware leader AAC Technologies, we bring advanced AI into real-world applications including smart devices, robotics, and intelligent sensing—creating impactful technology used worldwide.

TetraMem X AAC DAY 2026

@ NTU Career & Attachment Office

Transforming Dreams
into Careers — Let's
Craft the Future.

FEBRUARY 26, 2026

3:00 pm - 5:30 pm

NTU

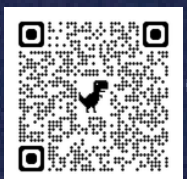

**91 Nanyang Ave, Wee Cho
Yaw Plaza, Level 4,
Hangout Space, 639956**

What to Expect?

- Explore internship and full-time opportunities in hardware & software engineering, including digital design, analog circuits, IC design, design verification, AI/ML, firmware, compiler, and FAE roles
- Meet TetraMem & AAC leaders and learn about careers in advanced AI chip development
- Discover cutting-edge in-memory computing and next-generation semiconductor innovation

Application
